

STRIKEBIT

Redefining Crypto Trading w/ AI Agents 🤖

Pitch Deck 2024

What is StrikeBit?

StrikeBit is redefining crypto trading with the power of AI Agents. Our platform enables users to launch customizable AI-driven agents that execute market strategies, analyze trends, and unlock profitable opportunities. From options and perpetual trading insights to a prediction marketplace designed for strategic bets, StrikeBit delivers a comprehensive ecosystem for traders. Whether you use your agents for advanced strategies or trade them for value, StrikeBit puts the future of AI-powered trading in your hands.

Problems

#1

The current options analysis platforms on Web3 space have notable gaps in usability and functionality. While platforms like Deribit offer some analytical tools, they are limited to specific exchanges, limiting overall market analysis. Additionally, key features like strategy saving and retrieval are missing, which hinders efficient decision-making.

#2

There is no user-friendly platform that connects traders with the complex realm of crypto options exchanges which enable traders to analyze market data, create and test trading strategies, and execute trades swiftly and accurately to make informed decisions and stay ahead in the market.

StrikeBit: Radiant AI

Radiant AI are autonomous AI agents that are designed to execute trading-related activities such as trading recommendations, risk management, sentiment analysis, copy-trading and more. Within StrikeBit's ecosystem, users can purchase different types of AI agents which fit their needs in the cryptosphere. StrikeBit aims to provide users the option to configure their agents to provide a better value to the cryptocurrency market.

The screenshot displays a dashboard for AI agents. At the top, there is a search bar labeled "Search Agent..." and a button labeled "Create New AI Agent". Below the search bar, there is a table with the following columns: "All AI Agents", "Market Cap", "1 Day Change", "Total Value Locked", "Holder Count", "Lifetime Inferences", and "Intelligence". The table lists ten agents with their respective details.

All AI Agents	Market Cap	1 Day Change	Total Value Locked	Holder Count	Lifetime Inferences	Intelligence
 Nova \$NOVA IP Influencer	\$85.1m	+7.28%	\$4.3m	60,608	53	34
 G.A.M.E.R \$GAMER Functiona	\$40.3m	-12.17%	\$3.8m	9,384	3235	3
 G.A.M.E.X \$GAMEX Functiona	\$14.9m	+16.92%	\$2.3m	1,912	45	234
 nexbit \$NEXBIT IP	\$207.1m	+23.04%	\$1.7m	18,210	234	55
 Lyra \$LYRA IP Influencer	\$2.8m	+43.15%	\$979.3k	1,331	2	23
 VaderAI \$VADER IP	\$58.5m	+76.18%	\$898.3k	10,117	234	6
 Zyra \$ZYRA IP Influencer	\$2m	+26.02%	\$829.4k	1,096	6	765
 Satoshi Bot \$SATOSHI IP	x \$38m	-4.82%	\$705.2k	8,505	0	88

TOKEN REWARDS

StrikeBit: Pulse

Pulse is a community-driven Telegram bot designed to engage options traders with daily challenges, real-time analytics, and educational tools. The bot offers users interactive features such as options strategy tips, market sentiment polls, and a leaderboard system that rewards participation with tokens.

StrikeBit: **Vates**

Vates is a decentralized prediction market platform designed to harness the collective wisdom of its community, allowing users to forecast outcomes on financial markets, geopolitical events, sports, and more. **Vates** also introduces a gamified experience, providing leaderboards and reward systems for top predictors, fostering a competitive yet collaborative community of forecasters.

StrikeBit: Scope

Scope is our suite of analytics tools that will pioneer options analysis. With features like free option chain, strategy builder, live P&L analysis, open interest market analysis, and premade strategies, Scope will solve the problems of options analysis in crypto.

Meet the Founding Team

Rahul Singh

FOUNDER / CEO

Rahul Singh is the visionary Co-founder and CEO of StrikeBit, a platform designed to revolutionize crypto derivatives trading by providing traders with simplified, data-driven tools. With over 8 years of extensive experience in blockchain and Web3, Rahul has consistently pushed the boundaries of innovation. As a co-founder of DevGenesis, he has spearheaded numerous successful projects in decentralized finance and digital assets, building a reputation for delivering cutting-edge solutions that resonate with both developers and end users. His expertise spans Web3, Solidity, and Rust programming, complemented by strong product leadership and strategic acumen.

At StrikeBit, Rahul is focused on making complex trading strategies accessible to traders of all levels. From advanced PNL analysis to AI-driven risk management, he ensures that the platform bridges the gap between powerful blockchain technology and user-friendly financial tools. His ability to align deep technical knowledge with a keen understanding of market needs positions him as a driving force in the evolution of crypto trading, empowering users to navigate the future of digital finance confidently.

Himanshu Pandey

FOUNDER / CTO

Himanshu Pandey is the C.T.O. and Co-founder of StrikeBit, bringing over 9 years of expertise in software development. A passionate options trader, Himanshu has a proven track record of driving the development of successful fintech products, including building decentralized exchanges (DEXs) and working on innovative prediction markets. At StrikeBit, he is dedicated to bridging the gap between traditional finance and the crypto market by architecting and building cutting-edge solutions.

As an Applied AI Engineer, Himanshu specializes in creating AI system architectures, fine-tuning models, and optimizing AI solutions. His deep knowledge of RAG and vector databases powers the advanced AI capabilities of StrikeBit, delivering transformative tools for modern traders and redefining possibilities in crypto trading and market analysis.
